

Florence (Lot: 5)

Swank Specialty Produce

14311 North Rd.
Loxahatchee, FL 33470
License Number: 12_449c9978

Order ID#: 20210315-690

Lab Code#: LC-20210315-1734
Product Type: Flower/Biomass
Lot designation: 5
of clippings: 4
Initial Weight (g): 37.93

Planting date: 15-Jan-2021
Sample date: 12-Mar-2021
Sample received: 15-Mar-2021
Completed: 17-Mar-2021
Report expires: 17-Mar-2022

CANNABINOIDS

Analysis Batch: WO-21031511
Analysis Date: Tuesday, March 16, 2021

Test Method: SOP 6.6
Instrument: Agilent HPLC, Instrument 33

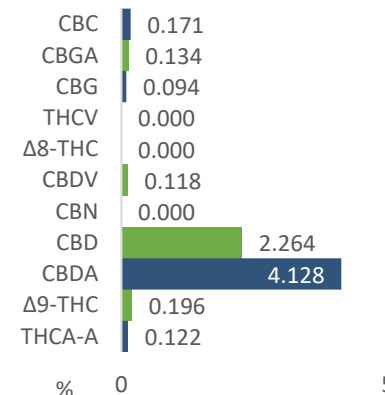

Analyte	% ^a	mg/g	MU Range (%)
THCA-A	0.1223	1.2229	0.071 - 0.173
Δ9-THC	0.196	1.960	0.15 - 0.242
CBDA	4.13	41.28	4.027 - 4.229
CBD	2.26	22.64	2.122 - 2.406
CBN	ND	ND	ND
CBDV	0.118	1.18	0.073 - 0.163
Δ8-THC	ND	ND	ND
THCV	ND	ND	ND
CBG	0.094	0.940	0.04 - 0.148
CBGA	0.134	1.337	0.055 - 0.213
CBC	0.171	1.705	0.093 - 0.249
Total:	7.23	72.25	

Total THC^b
0.303%
PASS

Total CBD^c
5.88%

TOTAL^d
7.23%

Potency Profile

^a Detection Level = 0.03% by dry-weight.
^b THC is calculated as %THC + (%THCA × 0.877). MU_{THC} = ±0.046%
^c CBD is calculated as %CBD + (%CBDA × 0.877).
^d The absolute sum of all cannabinoids above the level of detection.

MOISTURE
3.5%

Test Method: SOP 6.6
Instrument: E15
Analysis Date: 16-Mar-2021

Comments:

None.

Authorization

Steven Perez, Laboratory Director
Approval Date: 17-Mar-2021

Test results are based solely upon the test article submitted to Americanna Laboratories, LLC in the condition it was received. Americanna Laboratories, LLC warrants that all analytical work was conducted in a professional manner in accordance with the requirements of ISO/IEC 17025:2017, such as comparison to Certified Reference Materials and NIST traceable Reference Standards. This report shall not be reproduced, except in its entirety, without the written approval of Americanna Laboratories, LLC. Test results are confidential unless explicitly waived. Void after 1 year from test end date.

ND=Not Detected, NT=Not Tested, ppm=Parts Per Million, ppb=Parts Per Billion, MU=Measurement Uncertainty. Limit of Detection (LOD) and Limit of Quantitation (LOQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure.
